

FJ60/62 34MM IDLER SHAFT KIT

KIT CONSISTS OF:

No.	Qty	Part No.	Description
1.	1	716934	INCLUDES:
2.	1		T/C IDLER SHAFT FOR 38MM GEAR AND 34MM CASE
3.	2		34MM THRUST WASHERS
4.	2		38MM CAGED NEEDLE BEARINGS
5.	1	716142	GEAR SPACER
6.	1	716151	CLUSTER GEAR SPACER

This idler shaft kit is designed to use the 38MM low range gear set we offer for the FJ60 and FJ62 Land Cruisers. This kit allows you to install these gears into a 34MM case.

The kit has a special designed idler shaft that steps down for 34MM case. The kit also includes two new thrust washers for the 34MM case and then two new idler needle bearings and a new spacer to fit the larger gear bore (38MM). The modifications to the case are the same on the both The 34 and 38MM cases and these modifications are listed on the low gear set (P/N 716938).

The early 34MM cases used two different input gear lengths. The gears could be 45MM long or 50MM long. The gear we supply is the longer 50MM length input. If you have the stock 45MM gear the stock spacer that rides up against the bearing will cause alignment issues with the new input gear to the cluster. We have provided a new spacer that will set the proper distance on the input gear (New spacer only used if your stock T/C had a 45MM long gear).

Photo shows both part numbers 716934 and 716938

SPECIAL NOTE: The components packaged in this kit have been assembled and machined for specific type of conversions. Modifications to any of the components will void any possible warranty or return privileges. If you do not fully understand modifications or changes that will be required to complete your conversion, we strongly recommend that you contact our sales department for more information. This instruction sheet is only to be used for the assembly of Advance Adapter components. We recommend that a service manual pertaining to your vehicle be obtained for specific torque values, wiring diagrams and other related equipment. These manuals are normally available at automotive dealerships and parts stores.
